

*For Immediate Release*

## **Hardy Introduces HI 1734-WS Weight Processing Module for Rockwell POINT I/O Systems**

SAN DIEGO, CA – April 2017 – [Hardy Process Solutions \(www.hardysolutions.com\)](http://www.hardysolutions.com) introduces the Hardy HI 1734-WS POINT I/O Series Weight Processing Module, a new plug-in module for Rockwell's POINT I/O chassis, the fastest growing segment of Rockwell controllers. This module is exceptionally easy to mount, set up, calibrate, and maintain. The HI 1734-WS is a true weight processing module designed for POINT I/O systems, as opposed to passing raw A/D counts through to the PLC for interpretation as in competitive models. It is easy to configure using a Rockwell Automation Add-On-Profile (AOP) and an easy-to-use Faceplate.

The HI 1734-WS is ideal for applications where fast, stable weight data and low cost of ownership are important. It is designed to be a high-performance replacement for analog transmitters with the advantages of noise filtering and vastly superior scale settling times. It is ultra-compact, reducing machine cost and control cabinet footprint. The module also includes Hardy Process Toolbox features: C2® weightless calibration, Integrated Technician™ system diagnostics, and WAVERSAVER® immunity from mechanical vibration.

HI 1734-WS highlights include:

- Fast and EASY to install and commission by snapping modules into terminal blocks onto a POINT I/O Network Adaptor, then using Rockwell AOP file to set up and configure in RSLogix or Studio5000 with no programming required
- Rockwell's Adaptor Products allow connectivity to EtherNet/IP, DeviceNet, and ControlNet in linear, star and ring topologies

- Ultra-low profile – just 0.5” wide and 3” tall
- Energy efficient – consumes just 1 watt when powering Hardy IT junction boxes and up to 4 load cells

For additional information on the HI 1734-WS, including full specifications, visit [HARDY HI 1734-WS](#).

**About Hardy Process Solutions**

Hardy Process Solutions has established itself as an industry leader in the weighing automation world by providing highly accurate precision measurements, while seamlessly integrating process weight signals into a plant control system. At Hardy, we believe that industrial weighing solutions should be EASY to engineer and operate. We believe that simplicity delivers the lowest total cost to own. That’s why our solutions are easier to install, integrate, commission, diagnose and maintain in all four areas of the supply chain.

1. STOCK - accurate weight and level measurement/monitoring
2. MAKE - adaptable weight & rate material feed measurement/control
3. PACK - for robust rate & weight feed measurement/control
4. SHIP - off-the-shelf static and dynamic check weighing solutions
