## **Hardy is First to Include Set-Up Wizard With Weight Processors**

SAN DIEGO, CA – March 3, 2016 – Hardy Process Solutions ([www.hardysolutions.com](http://www.hardysolutions.com)) now provides a Set-Up Wizard for its HI 6500 and HI 6300 Weight Processors that greatly reduces the setup time and complexity typical of industrial weight processors. The Set-Up Wizard automatically launches when the instrument is powered up, and is designed to help even beginners succeed at producing fast stable weight data – without having to read a lengthy product manual. Easily accessible through both the front panel display and the built-in webserver, the Wizard covers the set-up of instrument communications, operational parameters, filtering and calibration with simple step-by-step instructions. In addition to walking a user through the process of setting up an HI 6500 or HI 6300 instrument for the first time, the Set-Up Wizard also shows users how to easily make changes after the initial set up is complete.

“Using the Set-Up Wizard is like having an experienced scale technician by your side,” says Timothy Norman, Product Development Manager for Hardy Process Solutions. “The Wizard aligns our instruments with our vision statement: At Hardy, we believe industrial weighing solutions should be EASY to engineer and operate. We believe that simplicity delivers the lowest total cost to own. That’s why our solutions are easier to install, integrate, commission, diagnose and maintain.”

Hardy’s Set-Up Wizard includes access to tips, suggestions, and a glossary of relevant terms through a one-click HELP button next to the task at hand. For a demo, visit: <http://hi6500.hardysolutions.com>.

**ABOUT HARDY PROCESS SOLUTIONS**

Headquartered in San Diego, California, Hardy Process Solutions has been providing customers with process control solutions for over 90 years and is best known for its innovative technology. The company prides itself on its ability to continuously provide superior product quality and excellent customer support.

Hardy, an ISO 9001-certified manufacturer, currently services the food, chemical, petrochemical, pharmaceutical, feed & grain, mining & metal, pulp & paper, oil and gas, power, and general automation industries. We have developed the most interface connection options in the process industry, including DeviceNet, ControlNet, EtherNet, EtherNet/IP, Remote I/O, Profibus, Modbus TCP, Analog, and Serial.

Hardy Process Solutions is also a proud Encompass Global Partner with Rockwell Automation®. We are an industrial scale company, offering accurate weighing scales including floor scales, load cells, platform scales, and more. Our plug-in weigh scale modules fit directly into MicroLogix 1500, CompactLogix, ControlLogix, SLC 500, and PLC-5 Allen-Bradley PLCs.
