TECHNICAL NOTE

**Model HI 6110 Display and HI 6600 Gateway modules.
Update Advisory Notice for HI 6110 display firmware version 2.8.**

This advisory notice concerns the compatibility of the display firmware version 2.8 for the HI 6110 display with the HI 6600 firmware version 1.0.0.32 and earlier.

The HI 6110 display version 2.8 requires the HI 6600 Gateway module to have firmware version 1.0.0.41 or above to operate correctly. Any prior version of HI 6600 firmware will not allow the display to show multiple channels correctly.
