

HI6150 Display Firmware

1. There are two firmware revisions for the HI6150 display. One firmware is specific only to HI6150 display board assemblies constructed with:
 - a. **Revision “A”** and earlier bare boards - HI6150 Display Firmware B.
 - b. **Revision “B”** and later bare boards - HI6150 Display Firmware C.
2. The bare board revision marking is located on the back bottom edge of the HI6150 display bare board.

- Applicable to all HI6850 units ordered with display option -PM2, -PMWS2, and all HI6150 displays ordered and received separately:
 - Before **October 10, 2024** will use Hardy firmware revision **1.7.2.32** or newer to update the display. HI6150 display bare board will show **revision A or X1**.

⚠ Ensure the firmware filename includes the digit “2” in the format 1.7.2.XX.

- After **October 11, 2024** will use Hardy firmware revision **1.7.3.32** or newer to update the display. HI6150 display bare board will show **revision B or higher**.

⚠ Ensure the firmware filename includes the digit “3” in the format 1.7.3.XX.
